DIRECTORY

BORROWERS

WE RECEIVE many complaints from our patrons to the effect that they are bothered so much by **BORROWERS**. These parties are not the private citizen nor the stranger in the city, who steps in, looks at the Directory and goes out, but merchants, business and professional men, who need a Directory every day of the year, yet who are too close-fisted to buy one.

These same individuals are the ones that borrow your Directory "just for a minute," which, in the majority of cases, means a day or perhaps a week, unless you remember that they have it and send for it.

These same borrowers will tell the Directory canvasser that he has "no use for a Directory," that he "knows everybody," and, vice versa, "everybody knows him."

Diamond Wall Plaster.

A pure selenitic cement mortar for plastering purposes employing White Lead and Oil as retarders. It is in every way superior to best lime mortar as regards

TENSILE STRENGTH,
TOUGHNESS, HARDNESS,
DURABILITY AND
FIRE AND WATER-PROOFING QUALITIES,

besides being less in first cost than OLD STYLE lime mortar prepared by OLD STYLE METHODS.

In one hour after using it may safely be

**Painted, Tinted
or Papered,**

thus saving the weeks of time required by lime mortar to harden.

Diamond Plaster is a complete cement, requiring the addition of water only to prepare it for immediate use, and since 1890, when it was first introduced in Indianapolis, it has been furnished to over 6,000 dwellings, store-rooms, etc.

DR. RUTLEDGE'S Antiseptic Earth Closet.

It is said by eminent physicians all over the country that many afflictions are induced by outdoor closets, such as Sciatica, Lumbago, Rheumatism of the Hips, Piles, Female Derangements, etc.

The above cut represents an in-door closet invented by Dr. Rutledge, by the use of which all danger from exposure is avoided. The closet is designed to take the place of a closet connected with a sewer. It is just as odorless as the closets which are flushed out with water. It is so arranged as to carry all gases through pipes to be connected with the flue or stove pipe, or run out through the roof.

These closets are manufactured and sold by Dr. E. D. Rutledge, and can be seen at his residence, 139 Hadley Avenue, West Indianapolis. Correspondence and investigation solicited.

DIRECTORY

BORROWERS

WE RECEIVE many complaints from our patrons to the effect that they are bothered so much by **BORROWERS**. These parties are not the private citizen nor the stranger in the city, who steps in, looks at the Directory and goes out, but merchants, business and professional men, who need a Directory every day of the year, yet who are too close-fisted to buy one.

These same Individuals are the ones that borrow your Directory "just for a minute," which, in the majority of cases, means a day or perhaps a week, unless you remember that they have it and send for it.

These same borrowers will tell the Directory canvasser that he has "no use for a Directory," that he "knows everybody," and, vice versa, "everybody knows him."

READ CAREFULLY.

TO FACTORIES, FOUNDRIES, ETC.

You are using machinery that can be improved.

You desire working drawings, blue prints, plans, specifications, etc.

We can design and build you special machinery, make your drawings, blue prints, etc.

You are caused frequently to witness certain parts of your machinery broken, and must have broken part replaced at once.

You use heavy machinery, pulleys, gears, etc. If they break, ship them to us and we will make pattern and casting, finish casting and send same to you at earliest possible moment.

If you have large gears, etc., that are liable to break, send us word and we will come and make drawings, then furnish pattern, casting, etc., as desired.

We make patterns of every description, in either wood or metal, for cast iron, malleable iron, brass, steel, etc.

We have one of the largest pattern and model shops in the West.

We make a specialty of large bevel and spur gears up to fourteen feet in diameter.

We have special room prepared for experimental work, and all improvements made by us while working on such work become the property of the inventor employer.

An inventor should take out a caveat on his invention, and then have the invention made practical, and apply for letters patent in its complete working order, thus saving much expense and giving a more valuable invention. All this we can do, having many years' experience in this line.

Write us for full information.
